

Fifth cruise terminal for Southampton

Southampton

ABP Port of Southampton has been voted the 'UK's number one departure port' by Cruise Critic UK Editors' Picks Awards for seven consecutive years. Year-on-year Southampton welcomes some of the world's largest and newest cruise ships.

It is Southampton's strategic location on the UK's south coast, excellent transport infrastructure and over 3,000 hotel beds in the city and surrounding area that ensures Southampton remains the premier venue for cruise lines to showcase their vessels to the UK and European markets.

The port is well located in the city, with superb transport links locally and further afield, making it the ideal place from which to experience the plethora of activities in the South of England. The region boasts a wide variety of fabulous attractions and outdoor pursuits. From a day trip absorbing the hustle and bustle of London, to afternoon tea in the New Forest National Park, or a visit to world-famous Stonehenge, there is something for everyone in the region.

To cater for the growing demand of the cruise passenger trade the port owner and operator, ABP, continues to invest heavily with its customers in state-of-the-art shoreside and marine facilities. Southampton provides five dedicated cruise terminals, two equipped with shore power, that are able to turn around the largest cruise ships afloat smoothly and efficiently. It is the intention of Southampton's port community that each of the two million guests passing through the port's modern cruise terminals continue to receive a superior service providing effortless cruise calls and a 'hassle free' start and end to a passenger's holiday.
